

Available in:

1kg bottles

Code: MTO2249

Barcode: 9312462224957

PRODUCT FEATURES

Manutec Bulb Fertiliser is a blend of high quality slow release materials, providing bulbs with all the essential nutrients required for optimal growth. Nutrients will be available to the plant steadily over a period of up to 6 months. With a high Nitrogen content, bulbs can quickly establish green growth. Added Calcium and Potassium will enhance plant vigour and disease resistance, promoting more colourful flowers. This fertiliser also features Organic nutrients derived from Fish, Seaweed and Humic Acid, assisting plant health and improving the soil condition.

ANALYSIS

ANALYSIS	%W/W
Nitrogen (N) as slow release	3.50
Nitrogen (N) as coated Urea	2.00
Nitrogen (N) as Organic	1.00
TOTAL NITROGEN (N)	6.50
Phosphorus (P) as citrate soluble	0.70
Phosphorus (P) as water soluble	0.60
TOTAL PHOSPHORUS (P)	1.30
Potassium (K) as Sulphate	4.00
TOTAL POTASSIUM (K)	4.00
Manganese (Mn) as Organic	1.50
Calcium(Ca) as Phosphate	2.80
Added Organic content (Humic Acid, Fish, Seaweed, Crab Shell)	25.00
Nitrogen to Phosphorus (N:P) ratio is 5:1	

DIRECTIONS FOR USE

If soil/pot mix is not prepared with Organic nutrient eg. Blood and Bone, fertilise bulbs with a half measure at planting. Apply a full measure when new growth starts to appear. Measure the recommended rate of fertiliser using container cap as indicated on label.

When planted in Soil Beds: Sprinkle evenly at the rate of 70g (full measure) per each square metre of top soil. Mix into the top 5cm of soil and water in well.

When planted in Pots: Apply at a rate of 30g (half measure) per each 30cm of pot diameter. Sprinkle evenly around each bulb. Mix into the top 5cm of potting mix and water in well.

NOTE: After planting, one application at new growth is usually sufficient for each cycle. However, for maximum results, a second application can be made soon after flowering appears, as bulbs can store excess nutrient until its next growth cycle.
