

**PRODUCT FEATURES**

Manutec Fruit & Citrus Special is a complete fertiliser, supplying all the essential nutrients and an increased level of the Trace Elements that maintain the vigour and cropping ability of Fruit & Citrus trees.

This is a chloride free, high analysis fertiliser formulated using quality sulphate based materials.

CAUTION: Avoid using on newly planted seedlings in soils and pots. We recommend using Manutec Fruit & Citrus Soluble Food or Manutec Planting Tablets for Fruit & Citrus when planting and until they are established. Once the plants are established in the pots, you can use these Fruit & Citrus Special granules.

**ANALYSIS**

ANALYSIS	%W/W
Nitrogen (N) as organic	0.50
Nitrogen (N) as ammonium	9.80
Nitrogen (N) as nitrate	1.20
<b>TOTAL NITROGEN (N)</b>	<b>11.50</b>
Phosphorus (P) as water soluble	1.50
Phosphorus (P) as citrate soluble	0.50
<b>TOTAL PHOSPHORUS (P)</b>	<b>2.00</b>
<b>TOTAL POTASSIUM (K) as sulphate</b>	<b>9.80</b>
Magnesium (Mg) as sulphate	2.30
Sulphur (S) as sulphates	6.20
Iron (Fe) as sulphate	0.50
Copper (Cu) as oxide	0.03
Manganese (Mn) as sulphate	1.00
Zinc (Zn) as sulphate	1.00
Boron (B) as borate	0.012
<b>Nitrogen to phosphorus (N:P) ratio is 5.75 : 1</b>	

Available in:

4kg bags - 4 per carton

Code: MBP0852

Barcode: 9312462004337

**DIRECTIONS FOR USE**

**When to apply:** It is important these nutrients are made available for the Spring and Autumn growth flushes. This is best achieved by applying in the 4 weeks prior. Depending on local conditions, Spring applications should be made in August; Autumn applications in February. Do not apply to young trees at planting time, only after new growth appears. Manutec Planting tablets for Fruit & Citrus Trees are recommended when planting young trees.

**How to apply:** It is important to water evenly around the root zone before and after each application. Spread the recommended amount of fertiliser evenly over the soil, out to the 'drip line'. Do not apply closer than 20cm from the trunk. Lightly scratch into top soil and water in well.

**Amount to apply per tree:** Applications for Spring should be two thirds of the yearly requirement, applications for Autumn should be one third. The amount to apply in a year is determined by the maturity of the tree. That is, 500g (approx. 7 adult handfuls) for each growth year. A maximum rate (5kg in a year) is reached after 10 years.
