

PRODUCT FEATURES

Manutec Fruit & Citrus Fertiliser is a complete balanced formulation that supplies all the essential nutrients and Trace Elements to maintain the vigour and cropping ability of fruit and citrus trees. It assists in the production of green, healthy foliage and large juicy fruits.

Not recommended for Potted Plants. Alternatively for potted plants, use Manutec Fruit & Citrus Special or soluble fruit & citrus food.

ANALYSIS

ANALYSIS	%W/W
Total Nitrogen (N) as ammonium	1 1.00 %
Phosphorous (P) as water soluble	1.80 %
Phosphorous (P) as citrate soluble	0.15 %
Phosphorous (P) as citrate insoluble	0.05 %
Total Phosphorous	2.00 %
Total Potassium (K) as chloride	13.00 %
Calcium (Ca) as phosphate	4.80 %
Sulphur (S) as sulphate	15.10 %
Manganese (Mn) as sulphate	0.15 %
Iron (Fe) as Ferrous sulphate	0.14 %
Copper (Cu) as Copper sulphate	0.02 %
Zinc (Zn) as Zinc sulphate	0.15 %
Boron (B) as borate	0.02 %
Molybdenum (Mo) as molybdate	0.004 %
Heavy metals (mg/kg or ppm)	
Lead: 14.50 Mercury: 0.70 Cadmium: 6.50	
Nitrogen to phosphorus (N:P) ratio is 5:5:1	

Available in:

2.5kg bags - 6 per carton

Code: MBP0252

Barcode: 9312462025028

8kg bags

Code: MBP8025

Barcode: 9312462080256

DIRECTIONS FOR USE

When to apply: It is important these nutrients are made available for the Spring and Autumn growth flushes. This is best achieved by applying in the 4 weeks prior. Depending on local conditions, Spring applications should be made in August, Autumn applications in February. **Do not apply to young trees at planting time or when re-planting. Only apply after growth appears.** Manutec Planting Tablets for Fruit & Citrus Trees are suggested when planting young trees or when re-planting.

How to apply: It is important to water evenly around the root zone before and after each application. Spread the recommended amount of fertiliser evenly over the soil, out to the 'drip line' (see diagram). Do not apply closer than 20cm from the trunk. Lightly scratch into top soil and water well.

Amount to apply per established tree: Applications for Spring flushes should be two thirds of the yearly requirement, applications for Autumn flushes should be one third. The amount to apply in a year is determined by the maturity of the tree. That is, 500grams (approx. 10 adult handfuls) for each growth year. A maximum rate (5kg in a year) is reached after 10 years.
