DIRECTIONS FOR USE

Seedlings: When planting, apply at a rate of 75grams (approximately one & a half adult handfuls) per square metre. Use as a base dressing, apply fertiliser evenly and water in well.

Vegetables & annual flowers: apply at a rate of 150grams (approx. three adult handfuls) per square metre of growing soil. It can be applied either as a side dressing or by scratching into the top of 3 to 6cm of soil prior to planting. Applications can be made monthly during growing season. Water in well before and after each application.

Established Trees & Shrubs: Apply in early Spring and early Autumn at a rate of 150grams per square metre of soil around the 'drip line' of the plant. Spread evenly over the soil, no closer than 20cm from the trunk. Lightly scratch into top soil and water in well.
