

PRODUCT FEATURES

Manutec Quality Lawn Fertiliser is a complete balanced formulation that supplies all the essential nutrients and Trace Elements required for green healthy growth.

Follow the directions on the package and use accordingly.

Note: A lawn that does not respond to fertiliser might have the wrong type of grass for your climate, or it might be suffering from the effects of compacted soil, disease or nutrient imbalance. If nutrient imbalance is suspected, have the soil analysed. Yellowing of lawn grasses, even when fertiliser is applied regularly, is often a sign of iron deficiency. This deficiency is most likely if your soil has a pH above 6.5. Deficiency can be corrected by applications of Manutec Iron Sulphate or Manutec Iron Chelate.

ANALYSIS

| ANALYSIS | %W/W |
|---|-------------|
| TOTAL NITROGEN (N) as ammonium | 16.00 |
| Phosphorus (P) as water soluble | 0.86 |
| Phosphorus (P) as citrate soluble | 0.09 |
| Phosphorus (P) as citrate insoluble | 0.05 |
| TOTAL PHOSPHORUS (P) | 1.00 |
| TOTAL POTASSIUM (K) as chloride | 5.00 |
| Calcium (Ca) as super phosphate | 2.40 |
| Sulphur (S) as sulphate | 20.05 |
| Iron (Fe) as ferrous sulphate | 0.14 |
| Manganese (Mn) as sulphate | 0.15 |
| Copper (Cu) as copper sulphate | 0.02 |
| Zinc (Zn) as zinc sulphate | 0.15 |
| Boron (B) as borate | 0.02 |
| Molybdenum (Mo) as molybdate | 0.00 |
| Nitrogen to Phosphorus (N:P) ratio 16 :1 | |

DIRECTIONS FOR USE

Manutec Quality Lawn Fertiliser is best applied 2 to 3 days after mowing lawn. Avoid applications when temperature exceeds 30 degrees.

Established Lawns: Apply once in Spring (at the beginning of the main growing season) at the rate of 1kg per 40 square metres. Repeat application in Summer and Autumn.

New Lawns: When lawn is 3 to 6 months old, apply at the rate of 1kg per 60 square metres.

Available in:

2.5kg bags

Code: MBP0255

Barcode: 9312462025059

8kg bags

Code: MBP8065

Barcode: 9312462080652
