

PRODUCT FEATURES

Manutec Ammonium Sulphate is a quick response fertiliser that is both easy and economical to use. Ammonium Sulphate provides Nitrogen, an essential nutrient for plants with a high proportion of green leaves. Nitrogen stimulates lush green leaf growth in small shrubs, flowering plants, leaf crop, vegetables and lawns. Plants lacking in Nitrogen have a stunted growth with pale green or yellow leaves.

Follow the directions on the package and apply accordingly.

Note: With constant use Ammonium Sulphate will acidify soil. It may be necessary to check soil pH annually.

ANALYSIS

ANALYSIS	%W/W
Nitrogen (N) as ammonia	21.00
Sulphur (S) as Sulphate	23.60

DIRECTIONS FOR USE

Grass Lawns: Apply 20 grams (approximately 3 heaped teaspoons) evenly over each square metre of lawn. Water the grass well before & immediately after each application to prevent fertiliser burn. Repeat applications every 6 to 8 weeks from early Spring to early Autumn.

Vegetables /Flowering Plants /Small Shrubs: Apply 30 grams (approx. 5 heaped teaspoons) evenly over each square metre of soil. Start applications three weeks after planting and repeat every 4 to 6 weeks from early Spring to early Autumn. After applications, hose fertiliser off foliage and water in well.

Available in:

2.5kg bags
