

### PRODUCT FEATURES

Most Australian soils are deficient in Phosphorus. This deficiency needs correction with a concentrated source of phosphorus. Corrections are best made with Superphosphate. Phosphorus is essential to all plants, helping in the transfer of energy from sunlight to plants and providing the energy needed for healthy root growth and reproduction. A lack of Phosphorus leads to poor root development, stunted growth and purple discolouring on leaves.

Superphosphate is useful when establishing new lawns as it provides soil with a level of phosphorus that can easily be maintained with regular use of Manutec Lawn Food.

Superphosphate is also ideal for encouraging healthy root growth in vegetables such as potatoes, carrots, parsnips, etc. Mixing superphosphate with garden lime gives an excellent fertiliser for legumes, e.g. peas, beans, lupins etc.

### ANALYSIS

ANALYSIS	%W/W
Phosphorus (P) water soluble	7.30
Phosphorus (P) citrate insoluble	1.30
Phosphorus (P) citrate soluble	0.50
<b>Total Phosphorus (P)</b>	<b>9.10</b>
Sulphur (S) as sulphate	11.50
Calcium (Ca) as super phosphate	22.00

### DIRECTIONS FOR USE

#### *Grass Lawns*

Apply 1kg (approximately 800ml) evenly over each 10 square metres of lawn. Water in well immediately after application.

#### *Vegetables*

Apply 1kg (approximately 800ml) evenly over each 10 square metres of soil. Dig in to top soil before planting shrubs. Water in well immediately after each application.

**NOTE:** Applications of Superphosphate are not recommended for Australian Native plants, particularly when grown in sandy soils.

Available in:

5kg bags
